Chiavari

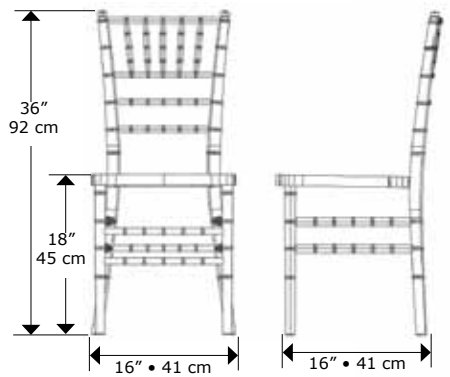

Chiavari STACKING CHAIRS

The aesthetic respects the old traditional look but... deep inside our resin Chiavari stacking chairs have been re-engineered ground-up. The NEW MIX of techno-polymers they are made of, makes them exceptionally strong, sturdy and a far better alternative to a plastic chair with a metallic insert, at a fraction of the weight. They feature easy handling and low cost maintenance, they are weatherproof, UV protected and don't need painting.

The material used at Drake is a composite multi-layer techno-polymer which allows the manufacturing of the strongest and lightest at the same time Chiavari resin chairs on the market. An outer smooth all weather resistant aesthetic fiberglass added skin, and an inner expanded closed cell modified resin with high mechanical resistance that behaves like a bone and gives exceptional strength to the chair.

CHIAVARI IN THE OUTDOORS

(resorts, parks, beaches... etc...)

A set of our patented lawn shoes (optional) is ideal to enjoy our Chiavari chair outdoors, preventing them from sinking into lawns or sand. Furthermore, the lawn chair shoes do not interfere with the chair ability to stack. One set includes 4 shoes for one chair.
